Carol Ni:13918370876

BAM PACKAGING

Our Services:

Professional consultation: One-on-one communication needs to ensure understanding of your brand concept.

Creative design: Combine brand characteristics to create a unique and attractive gift box packaging.

Accurate Sampling: Provide samples quickly to ensure the design meets your expectations.

Bulk production: Efficient production process to ensure product quality and delivery time.

Customizable packaging boxes: Wine boxes, Tea gift boxes, Flower boxes, Mid-Autumn Festival and Dragon Boat Festival Gift boxes, Electronic product packaging boxes, Cosmetics gift boxes, etc.

BAM PACKAGING

20 years+

Focus on one-stop service
for customized paper gift
box packaging.

500+

500+ brands trust us,
covering multiple
industries.

10,000+

We have completed more
than 10,000 packaging
design projects.

98%

98% customer satisfaction, we
are committed to exceeding
customer expectations

100%

100% recyclable materials are
used to promote Eco-friendly
packaging.

BAM PACKAGING

01

Paper Material

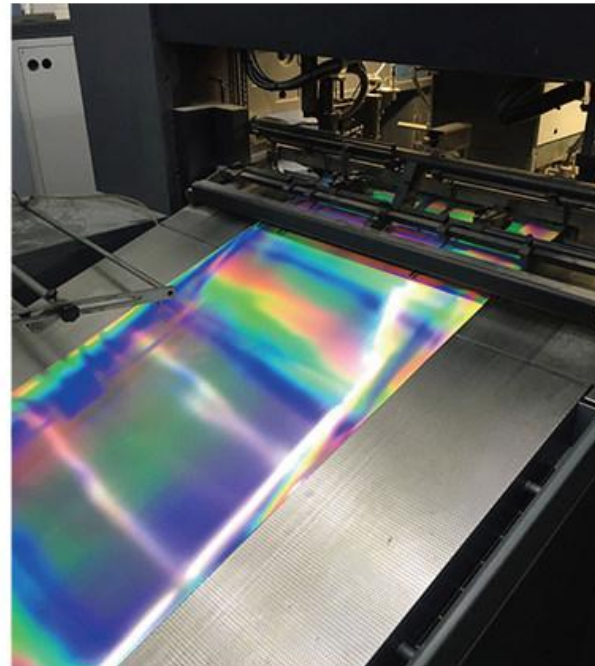

Select appropriate paper and other raw materials according to customer needs to ensure product quality and aesthetics.

02

Artwork Design and Sampling

Design gift boxes according to customer requirements, including appearance, structure, size, etc., to ensure that the gift boxes meet customer expectations.

03

Mass Production

The designed gift boxes are produced and processed, including cutting, folding, gluing and other steps to ensure the quality of the gift boxes.

BAM PACKAGING

01

Eco-Friendly Paper Materials

Use biodegradable and recyclable environmentally friendly materials to reduce the impact on the environment and improve the environmental performance of the product.

02

Smart Packaging

Use IoT technology to achieve intelligent connection between packaging and products, and improve product safety and traceability.

03

Customization

Utilize 3D proofing technology to achieve personalized customization of packaging to meet the needs of different customers.

Quality Control and Testing

During the production process, the raw materials are strictly inspected to ensure that the quality of the raw materials meets the production requirements.

Testing of raw materials

During the production process, the production equipment, production environment and production process are monitored in real time to ensure the stability and reliability of the production process.

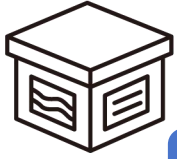

Production process monitoring

After production is completed, the finished products are strictly quality tested to ensure that the quality of the products meets national standards and customer requirements.

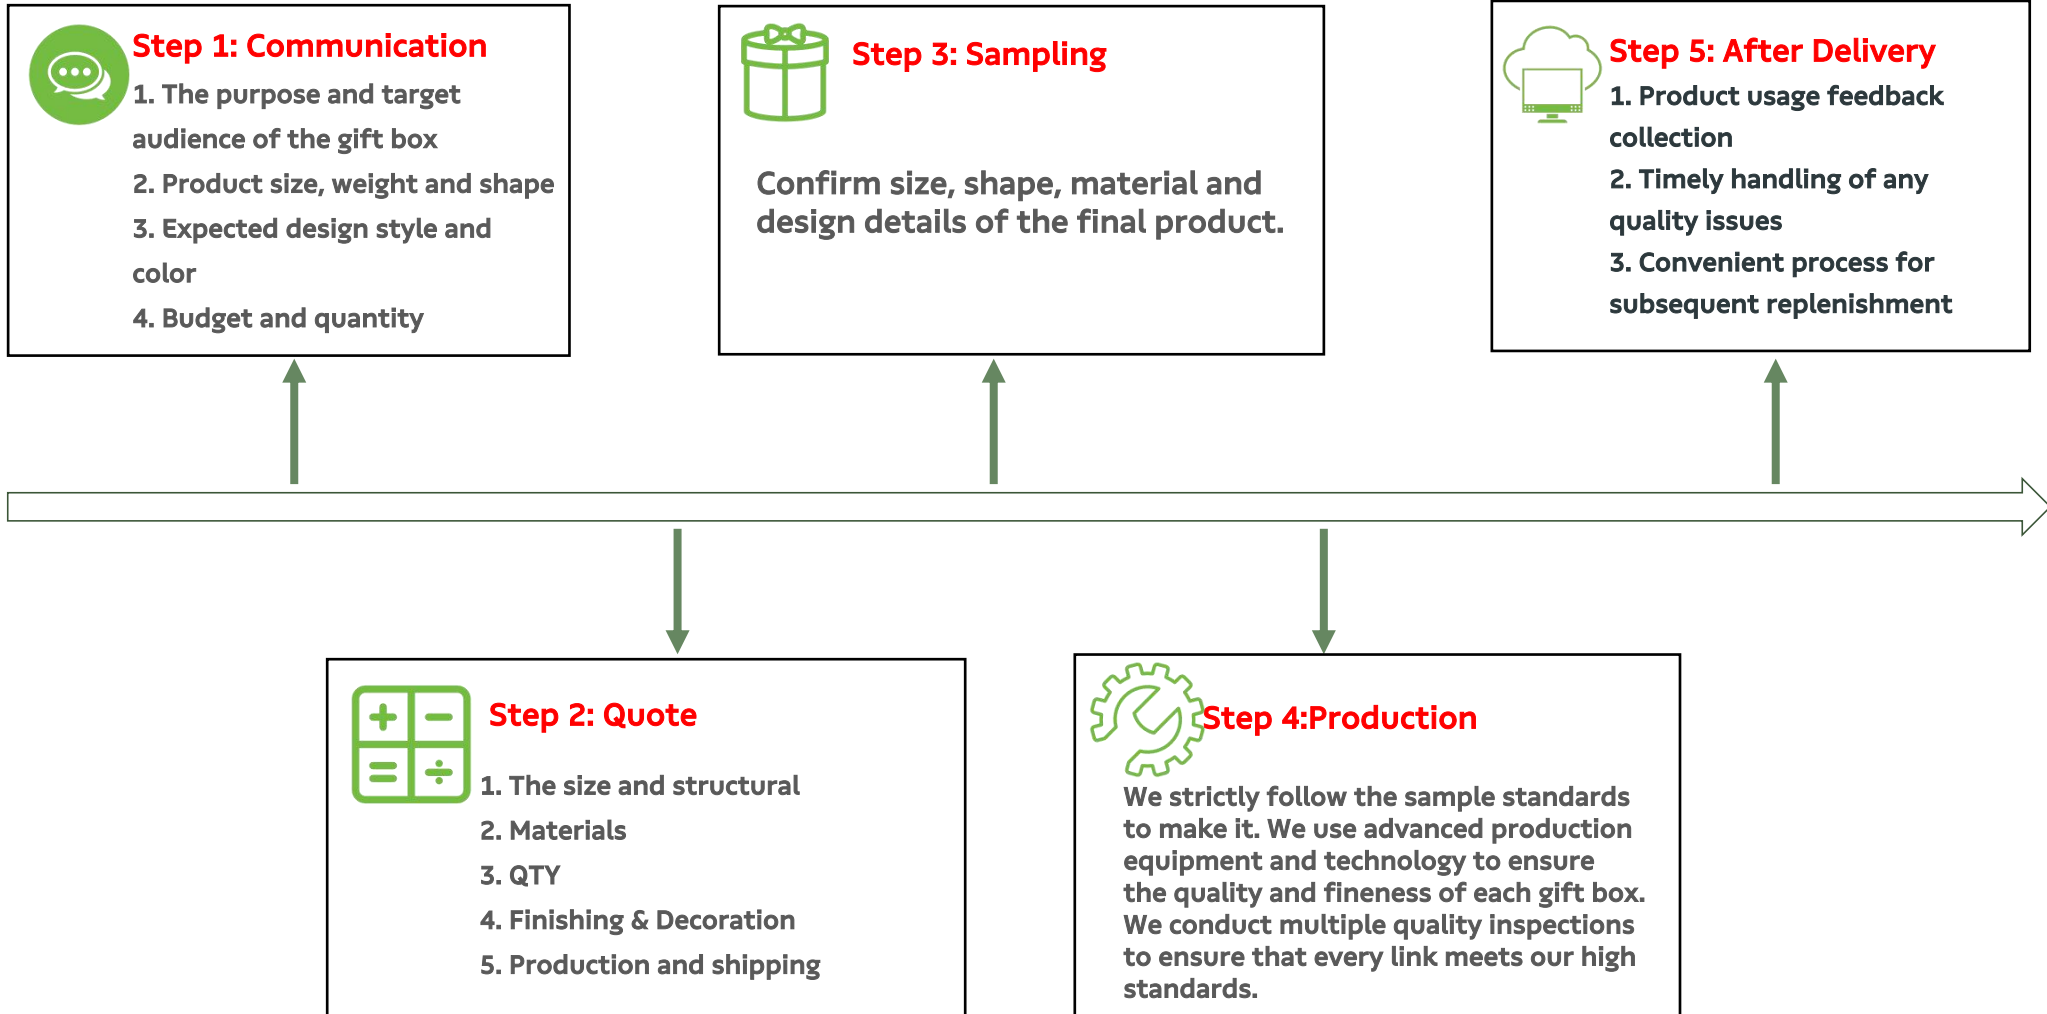

Finished product quality inspection
